

Let's fly

Jodeci

[Intro: JoJo]

Yo, Yo, Hold up!

Check this out, everybody repeat after me

Alright here we go, ohhh ohhh ohhhh (ohhh ohhh ohhhh) 4x

Check this out, here we go, get busy!

[Verse 1: JoJo]

Now are you tired of messing around?

They're into our business, let's get down

I'll take you far away from the troubles of this world

Get high off our love, me and you girl (sing it)

[Hook: K-Ci and Jojo]

We can leave tonight

(Let's take a seven) Let's take a seven-third tonight

(Let's fly through another world, yeah) Let's fly through another world

(No one) No one but me and you, girl

[Verse 2: JoJo]

(Check this out) Sheee looked at the sky, it looked so fair

So tonight's top flight of a cold new air

So slide next to me, I wanna be your fantasy

And let's fly with love we share (ohhhh)

[Hook: K-Ci and Jojo]

We can leave tonight

(Let's take a seven) Let's take a seven-third tonight

(Let's fly through another world, yeah) Let's fly through another world

(No one) No one but me and you, girl

[Bridge]

Ohh, ohhh, ohhhh (4x)

Oh yeah (7x)

[Verse 3: DeVante Swing]

Well I'm the man in black, with a jean that slacks

I don't smoke crack, so my lovin' ain't wack

But who says "crack is wack"? What is a rack of a girly's back?

Fact is, I'm no lack, miss

I go smooth, with no delayin'

So check what I'm sayin', honeydip, I'm not playin'

'Cause once you come in, it's off with the boots

And I start seducing, let loose the juicin'

Aw yeah! I was in and out of there

Yeah, I played you like a game of double-dare

I got sex skills like you've never seen before

From the sink, to the tub, to the floor

So here's your ticket to your love flight to ecstasy

Since it's up to me, I won't half step G

So when you wanna come on by

Don't forget your pills, we're gonna fly

[Hook: K-Ci and Jojo]

We can leave tonight

(Let's take a seven) Let's take a seven-third tonight

(Let's fly through another world, yeah) Let's fly through another world

(No one) No one but me and you, girl

[Outro]
Ohh, Ohh, Ohhh (2x)
