

Those Things

Jodeci

Hey what's your name
Let's meet up in the sheets
I hope we got the same interest doing the freak
You inspire you're unique yeah you hot let's meet
Let's meet I think you hot yeah we should speak
Girl I just want to take you out
And do those things that lovers do
(4X's)
I want to take you out
I'm steadily trying to find the words to say
Cause you really don't know really peepin' your flow hit a few notes
Flip the track Devante take em back
I've been watching you for so very long
You ought to come and talk to me
For the third time, for the fourth time
For the fifth time, for the eighth time
For the ninth time I don't mind
Speak ya mind cause you's a dime
I don't mind just to get you next to me
Persistency
Every freakin' day every freakin' night
You know I just want to take you out tonight
Baby I just want to be with you tonight
Girl I just want to take you out tonight
I want to take you out your what this life is all about
Maybe take you to the moon
Maybe drive you down south
You can have a lovely night I promise you no doubt
Or maybe later on I'll get my tongue in your mouth
If you don't mind you're so fine
Do you wanna go
Baby I just gotta know and have to know if we can get freaky to night
Baby I just gotta know and have to know if we can get freaky to night
(Every freakin' day every freakin' night)
Baby I just gotta know and have to know if we can get freaky to night
Baby I just gotta know and have to know if we can get freaky to night
(Every freakin' day every freakin' night)
When we dance move your body close
Close, close, let's get close
Close, close, let's get close
Close, close, let's get close
Close, close, close, close, close, close, close, close,
close....
