

Dandelion Hair

Joe Brooks

I never thought that this morning would ever come
Over mountains, through doors, we have always won
Laid bare we've shared every shadowy heart

I've played out this scene, oh, so many nights
And for a moment, we are timeless
Bare feet in the grass with your dandelion hair

No, I am not scared

If there's one in a lifetime
There is no doubt in my mind
Feel the Earth as it moves
As I stand here with you

As your eyes meet with my eyes
Beautiful in the sunlight
Breathe in to me
Feel the Earth as your heart beats faster
My heart beats faster

I was close but never here before
Afraid of falling again, not to be caught
But I see my dream as you stand before me
As you stand before me

I play these calloused hands and give you all I can
I'm not much but you make me the wealthiest man
And I'm in love, and here I stand
So come on love, come on love

If there's one in a lifetime
There is no doubt in my mind
Feel the Earth as it moves
As I stand here with you

As your eyes meet with my eyes
Beautiful in the sunlight
Breathe in to me
Feel the Earth as your heart beats faster
My heart beats faster

[3x:]
Come on love
Come on love
Come on love

Won't you
Won't you
Come on love
Come on love

Won't you come on love
Won't you now come on love
Come on love

Won't you love

Don't you come on love
Won't you now, now

Won't you come on love
Won't you come on love

[3x:]

Come on love
Come on love
Come on love

If there's one in a lifetime
There is no doubt in my mind
Feel the Earth as it moves
As I stand here with you

As your eyes meet with my eyes
Beautiful in the sunlight
Breathe in to me
Feel the Earth as your heart beats faster
My heart beats faster
