

Constellation

Joe Jonas

Feel the chemicals react
When you're holding me like that
Only so much that we can control

I felt every fear till the fear ran out
I felt every pain, but we made it somehow
Built a monument, saw it all fall down
Saw a brand-new shape and a brand-new sound
Everything I lost, everything I found
Lose it all again, just to be here now

It's a constellation
Couldn't see it all before
Some stars, they burn out
And some come back around
It's a constellation

Can we let the Earth repair?
What's gone and what's still there

I felt every fear till the fear ran out
I felt every pain, but we made it somehow
Built a monument, saw it all fall down
Saw a brand-new shape and a brand-new sound
Everything I lost, everything I found
Lose it all again, just to be here now

It's a constellation
Couldn't see it all before
Some stars, they burn out
And some come back around
It's a constellation, yeah

It's a constellation
It's a constellation

Feel the chemicals react
When you're holding me like that

Ah, it's a constellation
Couldn't see it all before
Some stars, they burn out
And some come back around
It's a constellation, yeah
It's a constellation
