Closer

Joe

Mmmm...
Going through the motions you never know when love
I put a call into commitment, but no one's picking up, oh
Then along came you, you're everything that I need, yeah
You brought the light and you brought the truth
Now I feel redeemed
I just want more of you tomorrow
Than I had of you today
I hope that's alright with now, would you stick around

'Cause I got to keep it close, yes I do (close enough to hear e very word you say)
I count to get you closer (closer than the moment are closer to me)
I got to get you close (close enough to be every thing you are)
I got to get you closer (closer than the second from now to mak e it last)

Feel alone in a crowded room, searching for a friend now
But I remember the afternoon that this love affair began
When I gave you my heart you took it
Gave you my pain and you roped back the tears
Can I take the time to thank you Lord, just for being here
Can't let the fire go out, I can't let the music stop now
Gotta shape my day around my love for you

'Cause I got to get you close (close enough to hear every word you say)
And I got to get you closer (closer than the moment are closer to me)
Can I get you close (close enough to be every thing you are)
Can I get you closer (closer than the second from now to make i t last)

For as long as it takes to make you happy with me
No price is too great to pay
All of means everything
And there is nothing I need more than your presence with me
'Cause I know you love me the most
And I could not live if you go

So I got to get you close (close enough to hear every word you say)
Can I get you closer (closer than the moment are closer to me)
Can I get you close (close enough to be every thing you are)
Close to my heart (closer than the second from now to make it l ast)
...
