

HOOLIGANG

Joey Valence & Brae

Yo, you want to see something cool?

No

Well I'm 'a do it anyway

Running and running and running and running and
Running and running and running and running and
Running and running and running and running and
Running and running and running and running and

Step into the scene

No, nobody can do it like me

Zoo Pals plate with a Kid Cuisine

I was the blacktop king

360s in my Green Machine

I was a kid and I was breaking down doors

Listening to Tribe now we on a world tour

We gave 'em hell and now now we gonna give 'em more

JVB Mighty morphin like Megazord

Yo power like ranger

Range like rover, strong bulldozer

Autobots roll out, hit the scene

Fresh wax on the paint, it's clean

Hooligang light up the tires

The JZs poppin and spitin out fire

Never retire, stare and admire, my drip don't expire

Oh my God that is fire

Running and running and running and running and
Running and running and running and running and
Running and running and running and running and
Running and running and running and running and

Cause I'm shell shocked like a Koopa Troopa

Everybody knows that I'm Super, Super, Super Saiyan

I was born indestructible

Now I'm always going ham like a Lunchable

I'm 'a stay running, this view is stunning

My blood is rushing, you got me blushing

I must keep trucking, won't catch me bugging

I'm the Omega. End of discussion

Hooligang who?

Cozy Coupe, that's the ticket

Shoes, Reeboks in twos when I choose to kick it

Fenced like a picket

Eyes stay glued and the style stay wicked

Swing through ya hood, Spider-Man

Initial D, drift Japan

Starving Wolf, Duran Duran

Green light red light

Don't stop when I'm running like

Running and running and running and running and
Running and running and running and running and

Running and running and running and running and
Running and running and running and running and
(Let me hear you say)
Running and running and running and running and
Running and running and running and running and
Running and running and running and running and
Running and running and running and running and
(Let me hear you say)
Running and running and running and running and
Running and running and running and running and
Running and running and running and running and
Running and running and running and running and

Yeah, that was pretty cool, I guess
