

# I Chose Right

John Barrowman

As I leave my single life behind  
Thoughts are kind spinning in my mind

First I think about you  
Then I think about me loving you  
Then I think about you and me  
deciding we can be one

It's crazy I know  
I wrestled with my pillow all last night  
Then I look at you  
and I know I chose right

Life's a very long road  
and the crossroads come up right away  
and it's sure hard to know which way to go  
when you've barely begun

And oh, oh  
the road you leave behind can shine so bright  
Then I look at you  
and I know I chose right

Now maybe we don't mean that much, you and I  
and maybe our balloon will never fly  
and maybe no one cares if we let things go by  
and maybe it doesn't matter if we live or die

But if I'm makin' promises to you today  
I wanna know I'll keep them all the way  
and if I've not been good at meaning what I say  
it's time now to try

So I think about you  
and I think about me loving you  
and I think of my friends who say they're in love  
when they're just having fun

But I say no, no, no  
if I am gonna love, it's with all my might

And I will be true  
I will follow this through  
Then I look at you  
and I know I chose right
