

Edge of Reason

John Cale

When the world erupts
When the willow speaks to me
How can I help you
Seeing mankind is ohh not so kind
We tear it all apart

Justice, rage, fear is a man's best friend
Can you see the light through the rain

Take me to the edge of reason
Show me where the pain has been
Seems we've gone too far to fix it
Leave it for another time

We can reverse the hate
Can you hear the pain in all those lies
Or am I just too late
They're all ready for war
Boots strapped tight, they believe the hype
How can I help you

Justice, rage, fear is a man's best friend
Can you see the light through the rain

Take me to the edge of reason
Show me where the pain has been
Seems we've gone too far to fix it
Leave it for another time

You can hear it from the wilderness
You can hear it sung at night
You can hear it from the wilderness
You can hear it sung at night
You can hear them

Take me to the edge of reason
Show me where the pain has been
Seems we've gone too far to fix it
Leave it for another time
