

We Belong In Love Tonight

John Conlee

What would you say if I told you that I love you
How would you feel if I held you with my eyes
I could take you flying high above the tallest mountains
You can believe it and if you believe it we belong in love tonight

What would you see if I opened my heart to you
How would you know if you let this time go by
We belong together sailing through the starry heavens
You can believe it and if you believe it we belong in love tonight

And I mean love and all the things that love can do
And I mean close your eyes and think about the two of us
When the morning comes and this night is all through with us
We'll still have love in our hearts and all you have to do is let it start tonight

What would you do if I said I had to have you
What would you lose if you came along with me
Once in every lifetime you can know a perfect stranger
You can believe it and if you believe it we belong in love tonight

You can believe it and if you believe it we belong in love tonight
