

Control

John De Sohn

Don't want you sober
I want you mad
And when it's over
Remember that
I want you so bad
Here from the start
You lit a spark
Blew it at my heart

Need somebody who can be
A treater, ain't mean to me
Need some one to make me feel
Something I can't control
Need somebody who can be
A treater, ain't mean to me
Need some one to make me feel
Something I can't control
Something I can't control
I can't control
Something I can't control
I can't control
Something I can't control
Something I can't control
I can't control
Something I can't control

Don't say you're sorry
No need for that
Don't wanna hear ya
Apologise
I like the way that
You're standing there
Like you don't care
No, don't you care

Need somebody who can be
A treater, ain't mean to me
Need some one to make me feel
Something I can't control
Need somebody who can be
A treater, ain't mean to me
Need some one to make me feel
Something I can't control
Something I can't control
I can't control
Something I can't control
I can't control
Something I can't control
Something I can't control
Something I can't control
I can't control
Something I can't control

Who am I to obey
Want you to not behave
Throw a punch at me
Go, stand in my way

Just like a falling dream
Falling right at me

Need somebody who can be
A treater, ain't mean to me
Need some one to make me feel
Something I can't control
Need somebody who can be
A treater, ain't mean to me
Need some one to make me feel
Something I can't control
Something I can't control
Something I can't control
I can't control
Something I can't control
