

# Fate

John Legend

Funny you enter, warm as the day  
Sun right through the window until it's gone  
Gone, oh  
With you in the picture, all up in my eardrum  
Drunk on your whisper, what have you done to me?  
Let me learn all the truth that you hide skin-deep  
Touch it once, now you want alone time with me  
And where's that high even come from?  
Pullin' me closer into your culture, it's destiny  
Yeah

Ain't no shortcuts where we come from  
We make diamonds from a breadcrumb  
We know every single turn we take  
In this bed we've made  
It was in our fate  
In this watercolor ocean (Watercolor ocean)  
We surrender to the motion (Surrender to the motion)  
We know every single turn we take  
In this bed we've made  
It was in our fate, oh  
(Our fate, our fate, our fate, our fate, ooh)

Man say he feelin' on the future  
Lay hands and then he hallelujah  
It's supernatural  
Ain't this that shit you been askin' for?  
We syncopated and  
As the world keeps changin'  
You and me, we don't miss a beat

Let me learn all the truth that you hide skin-deep  
(Oh, learn all the truth that you hide skin-deep)  
Touch me once, now you want alone time with me  
And where's that high even come from?  
Pullin' me closer into your culture, it's history (History, history)

Ain't no shortcuts where we come from  
We make diamonds from a breadcrumb  
We know every single turn we take  
In this bed we've made  
It was in our fate  
In this watercolor ocean (In this watercolor ocean)  
We surrender to the motion (We surrender to the motion)  
We know every single turn we take  
In this bed we've made  
It was in our fate

Woah, our fate (Yeah)  
Ain't no shortcuts where we come from  
We make diamonds from a breadcrumb  
We know every single turn we take  
In this bed we've made  
It was in our fate, yeah
