

# Back To You

John Lundvik

Can you hear me talking  
I'm calling out your name  
See my days turn to months and we still don't change  
Is that you I hear whisper  
Or is my head playing games  
See we both know our fears but we stay the same

There was a time when you looked my way  
There was a time when you looked at me different

But we've been through so much lately even neighbors start to see  
Yeah, we got some type of drama like we're in those magazines  
But even when its crazy miss your lipstick on my cheeks  
Cuz wherever you go hope I find my way back to you  
See wherever you go hope I find my way back to you

I remember how it used to be  
Sweep you off your feet  
Now I'm here on my own try to relive our history  
I remember all the words you said  
The things we used to do  
See the further we part I just wanna be close to you

There was a time when you looked my way  
There was a time when you looked at me different

But we've been through so much lately even neighbors start to see  
Yeah, we got some type of drama like we're in those magazines  
But even when its crazy miss your lipstick on my cheeks  
See wherever you go hope I find my way back to you

But we've been through so much lately even neighbors start to see  
Yeah, we got some type of drama like we're in those magazines  
But even when its crazy miss your lipstick on my cheeks  
Cuz wherever you go hope I find my way back to you  
See wherever you go hope I find my way back to you
