

## Long Gone Midnight

John Mayall

Long gone midnight  
And I want my woman so bad  
No use waiting for her  
She won't come, I call that sad

Long gone midnight  
And it's a cold wait till the dawn  
Sometimes love can make you wish  
That you had never been born

Long gone midnight  
And I miss her though she don't care  
When you've just lost your lover  
There's nowhere to go  
Nowhere
