

Road Dogs

John Mayall

People talking about the road is such a tough life
It maybe could be so
But if you're looking for a recipe for road shops
The Bluesbreakers know
Because we are the road dogs
Destination everywhere
Smooth as a groove with the traveling blues
Heading for the county fair

If you listen to the bitchin' of the rock stars
We get sick of that stuff
Too many roadies in fancy private airplanes
Never ever good enough
Take a lesson from the road dogs
Keep it simple everyday
A well oiled machine we try to keep it lean
We got a lot of blues to play

Never need to have a whole fleet of semis
A two car rental will do
Buddy at the wheel and Johnny lying in the backseat
Hank and Joe will leave that to
We're professional road dogs
Got another gig to play
Rackin' up the miles, people rockin' in the aisles
No one else can do it our way

We're the road dogs
Keep it simple everyday
We're a well oiled machine we try to keep it lean
No one else can do it our way

People wonder how we manage all the business
Never let it get us down
Get your calendar get ready with a marker
We're heading for your town
Looking for the road dogs
Destination always new
Smooth as a groove with the traveling blues
We got a lot of things to do
