Took the Car

John Mayall

Took the car and drove off the hills Saw the flashing lights an d saw them die. I left behind society that kills Me and Nancy w aved them all good-bye. I took the car the sun was going down

Saw the changing colours of the sky. An old Apache canyon our c amp-ground

Secure and safe together made us sigh.

Took the car and filled the trunk with wood. Took it back and m ade of it a fire

To be a child again would be so good Me and Nancy warm in our d esire. Took the car and drove it everywhere Through the land wh ere all the west began. Desert wind was blowing in our hair

Me and nancy running hand in hand.
