

How Much Difference Does It Make?

John Nolan

The thrill is gone, you're leaving town
Wrestling fear and full of doubt
But you got the bottle and you've got the crown
There are some things you can't live without

Who can say who's to blame?
And how much difference does it make?

You lost so much, now you're losing faith
I'm watching from a distance
I don't know what difference I can make
I'm calling out your name but you can't hear a thing
I'm calling out your name, you can't hear a thing

Who can say who's to blame?
And how much difference does it make?
Wide awake, I'm wide awake
And how much difference, how much difference does it make?
How much difference does it make?

So when you're lost in your mind
What will you find?
What will you find?
Are you afraid of what you love
Or in love with what you're afraid of?
Can you navigate this fall from grace?
Do you know?
How much difference does it make?
Can you find your way?
Can you find your way?
Can you find your way home?
Do you know?
How much difference does it make?
