

# Far From Here

John Splithoff

The magic is gone  
I think we've been here too long  
The people don't dance the way they used to  
It all feels wrong

My heart's not in it like it was  
Been feeling so out of place  
The memories bring back the buzz  
And then it fades away

All I wanna know is  
If you're feeling the same way too  
We've been falling in slow motion  
So let's follow through and try something new  
'Cause darling

In my mind  
We're already so far from here  
Spending every night  
In another atmosphere

We've been seeing the same old faces  
The days turn into years  
But darling in my mind  
We're already so far, already so far from here

I got a picture of us at sea  
With the wind blowing through your hair  
Don't know exactly when that will be  
But I'm gonna take you there

All I wanna know is  
If you're feeling the same way too  
We've been falling in slow motion  
So let's follow through and try something new  
'Cause darling

In my mind  
We're already so far from here  
Spending every night  
In another atmosphere

We've been seeing the same old faces  
The days turn into years  
But darling in my mind  
We're already so far, already so far from here
