Night Drive

John Splithoff

I wanna chase the stars
Get away
Get in my car and make my escape

Tonight I want you
To Come with me
Take some time while the worlds asleep, yeah

I want you with me baby
I need you here
You keep me breathing baby
You make me feel like

Leaving this city behind us
Drive till the world wakes up
Go somewhere where they can't find
Drive cause we've had enough

Oh won't you ride with me
Drive with me
Oh won't you ride with me
Drive with me
