

Plateau

John Splithoff

No one else on the road tonight
Headed west to the coastal line
Desert stars like fireflies
Glow in your eyes
So if we do it then let's do it right
And get a taste of a different life
By leaving all that we know behind
To see what we find

Oh darling you know
I only wanna roam with you
From the plateau that we're living in
To every summit and cove

Oh darling you know
I only wanna roam with you
From the plateau we're living in
To a place we call home

The valley air is what I want to breathe
You're sitting on the passenger side
I don't care that it was hard to leave
Caught up in the big city mind
Out here there's a warmer breeze
Under the cerulean sky
We can be anyone we want to be
We'll always be you and I

Oh darling you know
I only wanna roam with you
From the plateau that we're living in
To every summit and cove

Oh darling you know
I only wanna roam with you
From the plateau we're living in
To a place we call home
