

Standstill

John Splithoff

We've been going through the motions
Tryna heal what we've broken
But the new turned old, the warm became cold
And so did our devotion

I forgot where we were headed
Cause the feeling's so embedded
As you pack your clothes, your eyes dry slow
You stay and I'll regret it

But I wish I could give you endless love
But I can'tt feel my heart beat like before

Now we've come to a standstill
I can't move I just stand still
Watching you as you stand up
To walk on out of my life

You and I will keep breathing
But I won't stop you from leaving
We both know that this standstill
Won't last only one night

Yeah I want you
And I'm trying so hard not to
We've lost our my minds, too many times
Don't need to let the goodbye haunt you

Oh I wish I could give you endless love
But I can't feel your heart beat like before
