

Big Time for Love

John Waite

These days I feel I'm fightin'
Everything in sight
I'm fighting for my freedom
For my life

Some bigshot with the money
Puts my back against the wall
The red brick's waiting
For another bullet hole

There's a Blitzkrieg on the border
It's a sexual pleasure/pain
I'm staring down an empty glass
Til the violence starts again

It's the big time for love
It's the big time
It's the right time for love
It's the big time for your love

The queen is in the palace
But my sister's in the rain
Neon girls and gunshots
Tickin' through my brain

They give you some detection
Bread and circus in your bed
A calculated showdown
It's very graphic bloodshed

Better put your house in order
There's a fireball in the sky
Kiss the wife and kids so long
Kiss your ass goodbye

It's the big time for love
It's the big time
It's the right time for love
It's the big time for love

This time it is
It's the big time
It's the right time for love
It's the big time for your love

We feel overdue
'Cause we know what it feels like
There's no more
No white flag

And communication too
It's the big time for love
It's the right time
It's the time for love

It's the big time for love
This time it is

It's the big time
It's the right time for love

Call a truce or forget it
Big time for love
