

# I Love You, I Love You

Johnny Cash

I love you love you  
I love you  
Just in case you care you know I do

I've done everything I know to do  
To catch your eye and get a rise from you  
I've said everything I know to say  
Till I'm afraid that I'll scare you away  
I've tried everything I know to try  
And if you won't love me I'm gonna die  
I'll be anything I need to be  
To make you want to bring your love to me

Cause I love you love you  
I love you  
Can't help it that I feel the way I do  
I love you love you  
I love you  
Just in case you care you know I do

I'll quit anything I need to quit  
Or I'll change anything to make it fit  
I'll start anything I need to start  
If that would mean you're givin' me your heart

I love you love you  
I love you  
Can't help it that I feel the way I do  
I love you love you  
I love you  
Just in case you care you know I do  
I love you love you  
I love you  
Can't help it that I feel the way I do  
I love you love you  
I love you  
Just in case you care you know I do
