

# I Love You Tonite

Johnny Cash

It sure has been a party, hasn't it, baby?  
We've really been down that road a time or two  
We checked into the best hotels from San Francisco to Paris  
And lived like royalty, me and you  
But remember years ago in that church in Ottawa  
We told God of our love and asked for His care  
And so He made us happen and He blessed us  
So if we were in the fold or out, He was always there

And I love you tonite  
Even more than I loved you in the sixties  
And I know that we are right  
Even more than I knew it in the seventies  
Oh, baby, ain't we a sight?  
Can you believe we made it through the eighties?  
And will we make the millennium?  
Well, we might  
I love you tonite

It's funny how we never settle down  
Though we love our home and sittin' by the fire  
But we can't be at home for three days till we get itchy feet  
And people always ask, "When are you gonna retire?"  
But your people have always been my people  
And you have always gone wherever I go  
And when it's all over, I hope we will go together  
I don't want you to be alone, you know

And I love you tonite  
Even more than I loved you in the sixties  
And I know that we are right  
Even more than I knew it in the seventies  
Oh, baby, ain't we a sight?  
Can you believe we made it through the eighties?  
And will we make the millennium?  
Well, we might  
I love you tonite
