

# The Way That You Love Me

Johnny Gill

Girl is so cool, something in the way she moves  
It's the one thing that I've grown accustomed to  
We fell in love on a starry night  
And I knew when she held me tight  
That the love would keep taking me higher and higher

It's the way that you love me girl  
All night long, all night long  
It's the way that you love me girl  
That keeps me strong

Won't you heal me? Heal me with your tender touch  
And enslave me with your kisses that I love so much  
And every time she walks in the room  
Just a smell of her sweet perfume  
Keeps my body alive with desire and fire

It's the way that you love me girl  
All night long, all night long  
It's the way that you love me girl  
That keeps me strong  
It's the way that you love me girl  
All night long  
It's the way that you love me girl  
That keeps me strong

We fell in love on a starry night  
And I knew when she held me tight  
That the love would keep taking me higher and higher

It's the way that you love me girl  
All night long, all night long  
It's the way that you love me girl  
Keeps me strong  
It's the way that you love me girl  
All night long, yeah  
It's the way that you love me girl  
That keeps me strong  
It's the way that you love me girl  
All night long  
It's the way that you love me girl  
That keeps me strong

It's the way that you love me girl  
All night long, yeah, yeah  
It's the way that you love me girl  
That keeps me strong  
It's the way that you love me girl  
All night long, yeah  
It's the way that you love me girl  
It's the way that you love me girl
