

Between You And Me

Johnny Hates Jazz

Into each heart some rain must fall
We had it all
Now there's nothing left to hide
Will all our dreams begin and end
With nothing more how can we pretend

All I ever wanted was to be with you
And girl, I know that you want me too
Don't go closing doors
Before you know what you've left behind

Between you and me
I know we can work it out
Turn this love around
Between you and me
We can find a way
If we put our hearts together now
Between you and me

Don't fall apart on me tonight
Who's wrong or right
Does it matter anyway
Time won't wait, open up your eyes
It's here and now it's you and I

All I ever wanted was someone like you
And girl, I know that you want me too
Don't go burning bridges
Before you reach the other side

Between you and me
I know we can work it out
Turn this love around
Between you and me
We can find a way
We can make it last forever

So if you want to break it
Just say the word and you're free
But if you wanna make it
You gotta believe

Between you and me
I know we can work it out
Turn this love around
Between you and me
We can find a way
If we put our hearts together now
Between you and me
I know we can work it out
We know what love's about
Between you and me
We can find a way
We can make it last forever
