## **Moment To Moment**

## **Johnny Mathis**

From moment to moment every moment that I live I live for every moment with you To see you, to touch you, to imagine this will be The moment when a dream comes true

Just an ordinary day becomes adventure Such sweet adventure I never knew And life will be rainbows as I learn the secret of The miracle that love can do

From moment to moment every moment that I live I live for every moment with you To see you, to touch you, to imagine this will be The moment when a dream comes true

And life will be rainbows as I learn the secret of The miracle that love can do

From moment to moment every moment that I live I live for every moment with you To see you, to touch you, to imagine this will be The moment when a dream comes true
