Welcome Home

Johnny Mathis

I can see that you're uncertain
About what to say and how
Wondering if the things we said before
Can be forgotten now
We were talking out of anger
Not speaking from our hearts
Every empty day's reminded me
We should never be apart

Welcome home
To the one who'll always love you
Welcome home
The dream that got us started
Can't come true without you
Welcome home

If we need to talk it over
Can't it wait a day or so?
What we can say without a word
Is all we need to know
I just know how much I've missed you
Take my hand and come on in
Baby, all that really matters now
Is that you've come back again

Welcome home
To the one who'll always love you
Welcome home
The dream that got us started
Can't come true without you
Welcome home

Don't you know the dream that got us started
Can't come true without you?
Welcome home
Welcome home
(Welcome home, baby)
Welcome home
