

## She'll Unwine Me

Johnny Paycheck

I swore I'd leave the world of wine behind me  
And be for her the man I should have been  
But now and then my old self somehow finds me  
And leads me down the path of grapes again

But she'll find me and she'll unwine me  
She loves me and she tries to understand  
Yes she'll find me and she'll unwine me  
She unwind me with her tender care again

I'll never know just why she chose to save me  
But now it's her I love and not the wine  
And so I'll fight the bottle back away from me  
But I just get tired of fighting all the time

But she'll find me and she'll unwind me...
