

TEN

Johnny Rain

This a tale of one lost awkward suburb
Two kids in a world we have yet to discover
When I saw a butterfly trapped in a small worm
Before she spread her wings and I watched them both flutter
When we didn't know what we had for each other
Those 2010 butterflies whenever you look my way
'Cause I believe
That love from you is perfect and he does not deserve to receive it
You don't realize the queen you are inside
Oh, it breaks me to pieces
Such jealousy and haste, am I the only one that sees you wasting time?
Because I know I could be the best friend that you ever had
The very best friend you ever had

It's spring of '13 and you're still with that fucker
Cold heart and disregarded, you're texting my number
Don't you do that to your wrists, my love
It all gets better in the end
Now see I had a dream that I'd make you my lover
T'was three years ago and it happened this summer
Everyday I've lived without you here
I regret when you look my way
Well here I am
I'm yours 'til the end
Always honest, no pretend
I'm your man
And you are my perfect Taylor Elisabeth Nelson
You like Mumford & Sons
Well I'll make a song for you just like them
Ten
Girl I don't know
But I promise to be the best friend that you ever had
The very best friend that you ever had

Now this was a tale of one lost awkward suburb
Don't give up, in time she'll know you truly love her
See living proof in mine
She made me the happiest man alive
Now she's the best friend that I'll ever have
The very best friend that I'll ever have
