

Slow Down

Johnny Reid

Hey, baby, what do you say we roll the windows down
get lost - take the long way around
feel the wind on our face
let the night carry us away

and - slow down

now, baby, what do you say we just count the stars
one by one here on the hood of this car
well, let 'em shine - let 'em shine all night
let 'em watch as I hold you tight

and - slow down
fall into me right now
and - slow down

wrap your arms around me
show me that you love me... yeah
