

Flower

Johnny Stimson

You can open up to me
Show me what's inside
Mother nature made us to intertwine

Lavender elixir so
Full of pheromones
Gimme one taste and you're gone

What if I can't get you out of my thoughts
What if my seasons don't change
What if you forget to forget me not
And we fade away

You're my little flower
Blooming in the night
Only for an hour
The northern lights

My casablanca sweetheart
Nectar so divine
Baby you're the best part
Of my life

What can I do
What can I say
To convince you
To stay

All I see are tulips and
I'm a hummingbird
Heavenly ambrosia in every curve

Honey dripping over my imagination
The fragrance
Keeps flowing straight down to my soul

What if I can't get you out of my thoughts
What if my seasons don't change
What if you love me then you love me not
And we fade away

You're my little flower
Blooming in the night
Only for an hour
The northern lights

My casablanca sweetheart
Nectar so divine
Baby you're the best part
Of my life

What can I do
What can I say
To convince you
To stay

Yeah

Oh
Yeah
Oh
