

Koala Before the Storm

Johnossi

Wasted hours make-believe, it could be the one I needed
Oh so stupid now I see, there's a ghost up in my head

That feeds on my needs again
One more day to come down and then

I could be sane
And you, you could be warm
We can be everything we ever were before

I could be sane
And you, loving and warm
We can be everything we ever were

Before before the storm

Got my lesson but no degree, saying don't you want me, baby
So pathetic on my knees, still I'm far away from home

To feed all my needs again
One more day to come down and then

I could be sane
And you, you could be warm
We can be everything we ever were before

I could be sane
And you, loving and warm
We can be everything we ever were

Before before the storm

You let me go
You let me go
Before the storm

You let me go
You let me go

Before the storm
