

Circle Back

Joji

Always be the first one now
Circle back when sun goes down

Can't even make it through the weekend
For a feelin'
Like there might be something missing
You like to say that we should leave it
You don't mean it
'Cause I end up right beside you
Another day, we're human beings
While we're breathing
We were chasing that addiction
Can't even make it through the weekend
For a feelin'

Wash, our hands
We can
Product of our
Pre-sent, past
No goodbye, cause'

This won't be the last time round
Circle back to where we are now
Always be the first one now
Circle back when sun goes down

Cause' I know
And you know
This won't be last time, yeah
This won't be last time, round

You go from warm to being icy
You're just like me
Guess that's why we stick together
I hit the bottom of your psyche
Now I'm climbing
Can you let me know? You better

We keep getting in our own way
Even my heart says: "We're never gonna run but"
We both are in the same place
I guess that's why we stick, yeah

Wash, our hands
We can, product of our
Pre-sent, past
No goodbye, cause'

This won't be the last time round
Circle back they way we are now
Always be the first one now
Circle back when sun goes down

Cause' I know
And you know
This won't be last time, yeah
This won't be last time, round

You can circle back anytime
You can circle back
You can circle back anytime
You can circle back
You can circle back anytime
You can circle back
You can circle back anytime
You can circle back

Alright
