

# Right On Time

Jojo

In my mind's eye, life is written in stone  
For a long time, thought I should leave it alone  
I don't want, I don't need anything distracting me  
Then I come to find something behind me  
Something that I didn't see  
On the blindside, you were waiting for me

See I thought that I knew, everything that I needed to  
But then I met you  
I didn't know that the stars could align  
But it happened right on time  
Right on time  
But it happened right on time

This is real life, it doesn't go how we plan  
In the middle of the daylight, we're walking right into quicksand  
Cause we don't need gravity or the Earth under our feet  
We can climb on up to heaven, we can sail the seven seas  
You're my white knight, and baby, I am your queen, mmmm

See I thought that I knew, everything that I needed to  
But then I met you  
I didn't know that the stars could align  
But it happened right on time  
Right on time  
But it happened right on time

Say you love, love me forever  
Never stop, I'm there for whatever  
Near and far, you're always everywhere and everything  
Say you love, love me forever  
Never stop, I'm there for whatever  
Near and far, you're always everywhere and everything  
Say you love, love me forever  
Never stop, I'm there for whatever  
Near and far, you're always everywhere and everything

See I thought that I knew, everything that I needed to  
But then I met you  
I didn't know that the stars could align  
But it happened right on time  
(Yeah, yeah, yeah)

Say you love, love me forever  
Never stop, I'm there for whatever  
Near and far, you're always everywhere and everything  
Say you love, love me forever  
Never stop, I'm there for whatever  
Near and far, you're always everywhere and everything  
Say you love, love me forever  
Never stop, I'm there for whatever  
Near and far, you're always everywhere and everything
