

Whalewatching

Jon Anderson

Since when did we know how the world invented to spin
The deepest ocean can't even begin
To realize, to know the meaning of lifeforms

Are we the caretakers, the friends of the earth?
Are we the takers of all we survey?
Don't let our human, be human being again

The movement calls the spirit feeling
The movement calls the power moment of truth
To save the whales
To save our children now

I seem to hear again
We're trying to save the earth
They break the waves
And glide clear into the sky
The whales of time don't ask for future now

They are to us
Children of the soul
We let them play
And we lose control
Don't ever think mother earth never knows

The movement calls, the spirit being
The movement shouts, remember my name!
To save the whales
To save all children now

Everybody - get listening
Everybody - part of the solution
Everybody - has a voice now
Everybody - be the choice now

The movement calls the spirit feeling
The movement calls the power moment of truth
To save the whales
We save our children now

Everybody - get listening
Everybody - keep watching
Everybody - get ready
Everybody...
