

# Red Carpet

Jon Bryant

Let's roll out the red carpet  
See where it may lead  
Let's finish what we started  
Nobody likes to bleed

Crashing into healing  
(Only what you can't avoid)  
Tell me what you're feeling  
(I'm just trying to make it right)

Don't wanna be alone here without you now  
Don't wanna be alone here without you now

Its not what we expected  
Nothing ever is  
A treasure was detected  
But we were only kids

All this years of digging  
(All I've ever wanted was a prize)  
And you've been taking naps  
(But I can't climb out on my own)

Don't wanna be alone here without you now  
Don't wanna be alone here without you now

You and me and me and you alone  
Together all alone  
You and me and me and you alone  
Together all alone  
You and me  
You and me

Found you in the twilight  
(Its funny how quiet we can be)  
You were fast asleep  
(When all our dreams are falling perfectly)  
Come out of the silence  
(You're coming back to the light you need)  
Your secrets safe with me

So happy to be home now  
(After all this digging in my head)  
It's everything I know now  
(I wanna hold you til the end)
