Time To Die

Jon Oliva's Pain

You have crossed the line Your suicide, the final ride You ignored the signs A helpless fight it ends tonight Your souls traveling on

All the twisted things you've done You thought you had the master plan Now it's all caught up to you And still you wonder why I can see right through you brother You're not fooling anyone Now you pay the final price It's time for you to die

Time is all but out
Death calls for you, what can you do
Try to form a lie to buy some time
So you can run and hide
And beg and plead before the lord
You'll be on your knees

All the twisted things you've done You thought you had the master plan Now it's all caught up to you And still you wonder why I can see right through you brother You're not fooling anyone Now you pay the final price It's time for you to die It's time for you to die

All the twisted things you've done You thought you had the master plan Now it's all caught up to you And still you wonder why I can see right through you brother You're not fooling anyone Now you pay the final price It's time for you to die

All the twisted things you've done You thought you had the master plan Now it's all caught up to you And still you wonder why I can see right through you brother You're not fooling anyone Now you pay the final price It's time for you to die It's time for you to die It's time for you to die
