

Starlight

Jon Pardi

I've been blessed and I have sinned
Wear the scars of where I've been
Lucky to be alive
And breathe in this midnight air
I swear you're right here
Get the chills on my skin
And that's when I get this feeling

You're shinin' down on me showing me the way
Angel in the night here to save the day
Like a light out of the dark straight across the sky
Up there in that starlight, starlight tonight
Yeah, tonight

Runnin' down this dream
Up against this road
Sometimes the only thing that I got
Keeps me movin' on
Right where I need to be
No matter where I go
I'm never too far from home

Got you shinin' down on me, showing me the way
Angel in the night here to save the day
Like a light out of the dark, straight across the sky
Up there in that starlight, starlight tonight
Oh, tonight

To the good that die young
Fighters for the freedom fought that keeps me free
And all the heroes in my heart who taught me to believe
And that's why I believe in things I can't see

Shinin' down on me, showing me the way
Angel in the night here to save the day
Like a light out of the dark, straight across the sky
Up there in that starlight, starlight tonight
Yeah, tonight
Shinin' down on me
