

# Crush Me

Jon Wolfe

Outrunning your memory  
It ain't ever easy  
But it helps me when I'm out with my friends  
It's good times  
Til that drive home  
And slow song comes on  
To crush me all over again

And oh how we tried  
And tried  
To make love work out right  
I gave all that I had to you  
In one melody  
You're right back with me  
Til those three minutes are through  
And just like that sad song  
We come to an end  
And you crush me all over again

There's moments I cling to  
Of nights when I held you  
And the way you wanted me back then  
But I know what will happen  
After one night of passion  
You crush me all over again

And oh how we tried  
And tried  
To make love work out right  
I gave all that I had to you  
In one melody  
You're right back with me  
Til those three minutes are through  
And just like that sad song  
We come to an end  
And you crush me all over again

In one melody  
You're right back with me  
Til those three minutes are through  
And just like that sad song  
We come to an end  
And you crush me all over again  
And just like that sad song  
We come to an end  
And you crush me all over again
