

I'll Never Be the Same

Jon Wolfe

Where we live ain't got no coast
Some black dirt land and old fence posts
Summer dust gets stuck in your throat
When it don't rain
And no bright lights 'cept that ol' moon
And you can't get nowhere soon
And the rodeo rolls in every June
I love this place
And that's why I'll stay

There's a wind out there with your name on it
Blowing right out of this town
And it don't matter how much I want it
I won't slow you down
So you go on and chase your golden sun
I always knew the day would come when you'd go away
'Cause girl you'll never change
You'll never change
And I'll never be the same

This love we got has sure been good
And I'd go with you if I could
But it's a long, long way to Hollywood
And these ol' boots and me ain't made for city streets

There's a wind out there with your name on it
Blowing right out of this town
And it don't matter how much I want it
I won't slow you down
So you go on and chase your golden sun
I always knew the day would come when you'd go away
'Cause girl you'll never change
You'll never change
And I'll never be the same

You go on and chase your golden sun
My heart will break when the morning comes and you drive away
'Cause girl you'll never change
And I'll be okay
But I'll never be the same
I'll never be the same
