All Luck

Jon Young

I'm up... I'm up all night
Trying to get this shit right
Just worked a nine hour shift
But can't sleep tight
Cuz got another job to do
And that's if these tracks banged out for you (2x)

Everybody thinking that it's all luck (7x)
That I made it this far

Over night success
Man far from that
Yeah these iTune checks wasn't always this fat
Had to work, had to grind, had to bang our tracks
After working long hours pushing pilot jacks
Went from hunts to stacks
Came from nuttin to this
Mothafucka's get pissed when they see my hits
I'm just doing what I do
Never dreamed of it ever getting this big
But I'm glad that it did man
I wanna apologize for what I got
I made it to this point cuz I worked non stop
Late night in my crib trying to make my shit hot
Learning how to make beats
And covers in Photoshop
Yeah it's true I was never that dude
That was getting all the chicks way back in high school
But now look at whose rocking shows, making moves
Taking pics with lil Jon in the V.I.P room... ME
I may never get up on the T.V
Or on the mic in Times Square when it's New Years Eve
But I feel that I did pretty well considering
That I did it on my own with out a god damn thing

Everybody thinking that it's all luck (7x)
That I made it this far

Went from a PC tower to a Mac book pro
Bootleg air Jordans, to authentic retros
Only thing that's really changed is a lil more doe
Same whip, same fit, still reppin for the O
Nobody wanna show me love but it's all good
My shits selling, when you wishing that your stuff would
Just gotta stay real and man you prolly could
Get on your grind
Put in time and it prolly should
Still got a long way before I'm ballin
But shit I'm good, cuz my whip aint staling
Just gotta set my feet, and I'll be flossing
But at least bill collector's aint calling

I'm up... I'm up all night
Trying to get this shit right
Just worked a nine hour shift
But can't sleep tight
Cuz got another job to do

And that's if these tracks banged out for you (2x)

Everybody thinking that it's all luck (7x)
That I made it this far
