

Bullets

Jonah33

To look now
but when the rains has poisoned
you are already in the middle of a storm
where are you gonna go?

to be fooled
I know you're tough, but you won't survive
even if you tried
to make it on your own

I'll take the pain
I'll take it all away

when the weight of this world
starts taking you down
you know you're not alone
let the bullets fly
let the bullets fly

when it seems like it's spinning in a free fall
and it feels like they have come to take it all away
I'll take a bullet in the face for you
I'll take a bullet in the face for you

I'll take the pain
(I'll take the pain)
I'll take the pain
(I'll take the pain)
I'll take it all away

when the weight of this world
starts taking you down
you know you're not alone
let the bullets fly
let the bullets fly

when life takes its toll
and you feel like you're losing sight
it's not just goodbye
I'll be by your side

let the bullets fly
let the bullets fly
