Come Through

Jonas Blue

I don't need ya, I don't need ya, I don't need ya
Tell myself that when I know it isn't true
When you said, "I'd be alright", yeah I believed ya
So tell me why now all I feel is more confused

Can you come through right now?
I could really use some you right now
Come and talk me through the night like only you know how
Can you come through right now?
I could really use some you right now
Tell me everything's alright like only you know how

Can you come through right now, right now?
Right now, right now?
Can you come through right now, right now?
I need you right now
Can you come through right now, right now?
Right now, right now?
Can you come through right now, right now?
I need you right now
Can you come through right

I know sometimes, and maybe I don't make it easy
And I'll say some things I know I shouldn't say
And if I ever said, "Maybe I didn't need ya"
But God, I'm sorry and I promise I can change

Can you come through right now?
I could really use some you right now
Come and talk me through the night like only you know how
Can you come through right now?
I could really use some you right now
Tell me everything's alright like only you know how

Can you come through right now, right now?
Right now, right now?
Can you come through right now, right now?
I need you right now
Can you come through right now, right now?
Right now, right now?
Can you come through right now, right now?
I need you right now
Can you come through right

Can you come through right

Can you come through right now, right now?
Right now, right now?
Can you come through right now, right now?
I need you right now
Can you come through right now, right now?
Right now, right now?
Can you come through right now, right now?
I need you right now
