

I Know a Place

Jonathan Roy

I, I know a place where we could go
Where there is water and no snow
Sun in the sky your green coloured eyes
Walking through forests there's no roads
Follow our hearts cause that's where we started

And I'll take you away someplace that no one goes
Oh yeah you, you just close your eyes and ride along
Cause you got me babe
You got me
You got me babe

Let's sway under the stars
The breeze on your skin
Wondering where we are
We're lost in each others arms
Cause that's where we started

And I'll take you away someplace that no one goes
Oh yeah you, you just close your eyes and ride along
Cause you got me babe
You got me
You got me babe
You got me
Oh, you got me baby

I, I know a place where we could go
