

## Science Fiction

Jonathan Thulin

I was stuck in reality till I met you  
Flying Han Solo when you broke through  
Every force field that I had in place  
Disappeared when I saw your face  
Held down by gravity till I saw you  
You had a special something that I was pulled to  
You came crashing through my atmosphere  
And clouded up what once was clear

This can't be the world I'm living in  
Somebody wake me up if I'm sleeping I'm dreaming now  
I'm out of my mind  
Your love is like science fiction [repeat]

Now I've gone from an earthling to an astronaut  
Whatever you ask of me I'll give it all I got  
When I'm with you all the stars align  
And I'm in love with the way you shine

Ain't the real world that I'm living in  
Being with you is like science fiction
