

# There's a Light

Jonathan Wilson

There's a light  
A light that's over me  
And all my friends and family would agree  
Hey look! its over you  
Its shining brighter still  
Hey man it's overdue  
But its your spotlight still

There is a feeling in the California air  
There is lust for peace  
And righteousness everywhere  
Lust for me and you  
And for our spirits too

There is a reason that we play among the stars  
A reason that we are just who we are  
A reason that we thrive  
Belief to keep alive  
A reason that we sing  
Our song and everything

There is a garden  
In the expanse of your mind  
The harvest will speak volumes in due time  
Flowers they will bloom  
And brother so will you

Teach us  
So we radiate  
Return us to our  
Newborn living state

There is inspiration  
In everyone you meet  
Every human being on the street  
They all sing a special song  
And when you sing along  
You are this for them  
One note will start the feeling

Today you will grow  
And though your heart was filled with stone  
The chains that were so limiting  
Well now they're gone  
You cut them right n half  
With your dream  
And with your laugh

You are the sky  
You are the sun  
You are America and you are everyone  
You are the miracle of love  
With all your children at your feet  
You are the ocean from above  
So dear so deep

Keep us

Floating in mid air  
In service to the feeling  
Of creations precious secret: love  
Believing in each other  
As we dance into eternity

There's a light  
A light that's over me  
And all my friends and family would agree  
Hey look! It's over you  
Its shining brighter still  
Hey man it's overdue  
But its your spotlight still
