

# Block out the Noise

Jonny Craig

Got our phones on, do not disturb mode  
Got each other, nobody else home  
The distractions, they multiply  
No disturbing, just you and I

Let's make a world where we do what we want  
No limits and no guard is up  
I'm in control and there's no need to stop  
Tonight

We block out the noise  
Only sound is my voice  
And now we focus on each other knowing that there's no one else around  
Block out the noise  
Only sound is my voice  
And now we focus on each other knowing that there's no one else around  
Block out the noise

No time limit, nowhere to go  
My hands moving on you real slow  
But I can speed it up on your demand, your command  
Tell me how you want it all to be  
We can make a getaway with no delay  
Baby, you just name the place

Let's make a world where we do what we want  
No limits and no guard is up  
I'm in control and there's no need to stop  
Tonight

We block out the noise  
Only sound is my voice  
And now we focus on each other knowing that there's no one else around  
Block out the noise  
Only sound is my voice  
And now we focus on each other knowing that there's no one else around  
Block out the noise

Close your eyes  
Turn out the lights  
Tell me what you need to make me feel alive  
No wrong or right  
Do what you like  
I'm gonna shut it down only you and I

Close your eyes  
Turn out the lights  
Tell me what you need to make you feel alive  
No wrong or right  
Do what you like  
I'm gonna shut it down only you and I

We block out the noise  
Only sound is my voice  
And now we focus on each other knowing that there's no one else around  
Block out the noise  
Only sound is my voice

(My voice)

And now we focus on each other knowing that there's no one else around  
Block out the noise
