

Larkin

Jonny Craig

Starting to heal
And after all of this time
I know how you feel
I know how you feel

I'm drowning in fear
And after all of this time
It's like you are here
It's like you are here

Our name engraved in skin
Carried through these veins
And tangled within
L-A-R-K-I-N
You were my best friend
And I couldn't let you in
I said this before
But hear it again
L-A-R-K-I-N

It's like walking alone in the dark
While taking a shot to the heart
And I'm out here stuck in the cold
I've been following tracks in the snow
Like a name that would guide me back home
It's a place to burn in my soul
I'm out here stuck in the cold
When will I find my way home
Find my way home

Now the time has passed
Oh, the memories we've had
And faces that changed
Oh, how we've changed

Now you won't let me in
I'm down on my knees
So tell me, when will this end
L-A-R-K-I-N

It's like walking alone in the dark
While taking a shot to the heart
And I'm out here stuck in the cold
I've been following tracks in the snow
Like a name that would guide me back home
It's a place to burn in my soul
I'm out here stuck in the cold
When will I find my way home
Find my way home

Where will we go
Footprints we left in the snow
Like walking in the dark
Like a shot to the heart
Where will we go
Couldn't find our way back home
We're out here stuck in the cold

So tell me, where will we go

So where will we go
Like footprints we left in the snow
Like walking in the dark
Like a shot to the heart
So where will we go
Couldn't find our way back home
We're out here stuck in the cold
So tell me, where will we go

While taking a shot to the heart
I'm out here stuck in the cold
Following tracks in the snow
Like a name that would guide me back home
It's a place to burn in my soul
I'm stuck here out in the cold
When will I find my way home
When will I find my way home
