

Version 2.0

Jordan Sweeto

I used to worry 'bout the things I couldn't take and change
But there's silence washing over what was left the re-arrange
I used to wonder if my story would be lost or told
Now all I know is I'm oblivious, my tale is undisclosed
So I'll breath easy
I know I'm not alone

When I'm with you I feel higher, take to Version 2.0
And I'm ablaze with a fire, you know I'd die to let you know
For every world I hold on to and every word that I have sung
I only wish to inspire people like you have while I'm young

I used to feel as though my every inner thought was cold
I turned my back on the promises and love I'd yet to hold
I used to howl into the night beyond the day break
But what I found was never miles away this choice is mine to make
So I'll breath easy
I know I'm not alone

When I'm with you I feel higher, take to Version 2.0
And I'm ablaze with a fire, you know I'd die to let you know
For every world I hold on to and every word that I have sung
I only wish to inspire people like you have while I'm young

And who's to say I change my tone
Now I'll breath easy
I know I'm not alone

When I'm with you I feel higher, take to Version 2.0
And I'm ablaze with a fire, you know I'd die to let you know
For every world I hold on to and every word that I have sung
I only wish to inspire people like you have while I'm young

Take me to Version 2.0
Take me to Version 2.0
Take me to Version 2.0
