

Anything For You

Jordana

What is the use?
Point my head down, look at my shoes
Never did glance at you
Being away allows me to

Many chances, you blew
Little did I know, I'd have no clue
Many would turn to few
Baby, my love I'd once called you

I think you knew that you were wrong
But did you think I'd end up gone?

I would've done anything for you
I would've moved mountains
And you knew all along
Should've guessed that after long
I would've been here writing this song

Copy and paste
Put myself back into place
Restore all of the peace
It really used to come so easily
Now I'm face to face
Between the devil and me and the human race
All for goddamn grace
The little amount I've left to take

I think you knew that you were wrong
But did you think I'd end up gone?

I would've done anything for you
I would've moved mountains
And you knew all along
Should've guessed that after long
I would've been here writing this song

I would've done anything for you
(I'll try to let it all out)
I would've moved mountains
(I'll try to tell you how I felt)
And you knew all along
(I'll try to let this wash away)
Should've guessed that after long
(I'll try to find the needle in the hay)
I would've been here writing this song

Oooooohhhh
Oooooohhhh
Oooooohhhh
Oooooohhhh

I would've done anything for you
I would've moved mountains
And you knew all along
Should've guessed that I'd be gone
I shouldn't be here writing this song
